Iceland is not only closer than you think, but far different than you ever imagined:

- The mountainous centre of the island, with its rocky deserts, jagged mountain peaks, ice caps, volcanoes, hidden valleys and hot springs
- Energetic cities, with spouting geysers, steaming solfataras and mineral spas
- Awe-inspiring wilderness with volcanoes, raging rivers and magnificent waterfalls
- White water rafting, sea kayaking, mountain biking, ice-climbing and horse-riding
- Whales just offshore, seals and puffins and a midnight sun throughout the summer
